Legend of new generation.

The Story

According to ancient books, there exists a paradise without borders and without strife.

In the wonderful land of Neutopia, humans, fairies, and magical beasts live together in peace and equality, each where it wishes, in the forests and in the springs.

But all is not harmony in Neutopia. The brave Jazeta had defeated Dirth, the Emperor of Darkness, but he is secretly rising again. He has sniffed out the forces of darkness concealed beneath the Neutopian peace.

Fearing the evil spirits and the strange events occurring throughout their land, the Neutopians have hidden in caves and secret places deep inside the Earth.

Your quest is to search for your father, Jazeta, who is lost in a labyrinth in a foreign land. But since you bear that legendary warrior's courage, you will set out to defeat Dirth, the Emperor of Darkness. You will save the Neutopians, who are now living in fear, bound by darkness.

If the player dies (the life gauge pales to pure white), you may continue (resume play) from the place at which you last received a password. Watch for and write down the password. Then, even after the game has ended, you can select "Continue" from the title screen, enter the password, and press the Run button to start over at the place at which you received the password. Your password is important—write it down when you see it!

Note: If you own a TurboGrafx-CD™ or TurboBooster-Plus™, see page 10.

Items

**Flail**

This weapon expands and contracts as you whip it, but you will lose 10 golds every time you use it.

Magic Staves

If you get hold of the magic staffs, you’ll be able to use three kinds of magic when you attack the enemy: fire, wind and lightning. You can use its magic any number of times as long as you’re still alive but its power depends on your life force—the number of hearts you have left. Keep an eye on your life force when you use these weapons!

- The winds will swirl around the player, and not one enemy will be left!

**The Lightning Staff**

- You can destroy the enemy in front of you by blasting him with lightning.
- You will be knocking out every enemy in sight!
**Note for TurboGrafx-CD and TurboBooster-Plus Owners**

If you're playing Neotopia II on the TurboGrafx-CD or the TurboBooster-Plus, you can save your game in backup memory ("RAM") indefinitely - as long as you turn your unit on at least once every two weeks!

1. **Initializing Your Backup Memory**
   - If you are using your backup memory for the first time, Neotopia II will ask you if you wish to "initialize" your backup memory. A backup memory that is not initialized (made operational) cannot save data. Please follow the screen instructions closely.
   - **Note:** If you are using the TurboGrafx-CD, you need to only initialize format once.

2. **How to Save Your Game Using the "File Cabinet" Feature**
   - Your game will be saved in what has been termed a "File Cabinet." There are 4 files, and you may use any or all of the files that are available.
   - To save your game, when Neotopia II asks if you want to see a password, respond "yes." The password will then appear in the upper half of the screen. The lower half of the screen will ask you if you wish to use the File Cabinet.

3. **What to Do If a File Cabinet is Full**
   - If a File Cabinet is full, Neotopia II will ask you if you wish to erase the contents. If you answer "yes," the old file will be erased (gone forever) and the new file will take its place.
   - **Note:** It's easy to accidentally erase a file when your Turbo Switches are in the "on" position. For that reason, try not to save your most important file in the "Neotopia II" cabinet, and always make sure your Turbo Switches are off when you respond to questions. Memory may also be lost if your backup memory unit is dropped or exposed to heavy shock. Do not touch the connection between the TurboGrafx-16 and the TurboGrafx-CD or TurboBooster-Plus.

**Playing Tips**

There is always a Boss Baddie in the middle of the labyrinth. If you don't have the key, you'll never make it into his room!! Move the rock to find the stairs!!
The gates will open when you kill the enemy.
You have got some new defensive equipment now. Your defense is stronger!! The strong shield will deflect enemy arrows.

**Some Advice**

For a strategy that is very effective against enemies that come at you from the front, face the wall and slash the enemy. When he rebounds, attack again. You'll defeat them easily!

**Game Progress**

When the game starts, you will first visit your neighbors to be equipped for the journey. There are many doors nearby. Enter them one by one and gather the information you will need for your quest.

- **Blast the enemy to destroy and collect gold.**

The moment you step out into the field, the monsters will start attacking. You'd better learn their movement patterns, fast!

- **The Monk of Life. If you meet him your life force will gain all hearts.**

When you enter the labyrinth, your first task is to find the Crystal Ball. Remember, you can use the Boom Bombs to blast your way through walls. There are hidden rooms and corridors, so use the map to find the Crypt Key. Then you can enter the innermost room, where you'll confront the Boss Baddie!!

- **The Boss Baddie of the first labyrinth. After you defeat him, retrieve the treasure...**
